

Amar Al-Zubaidi

Toronto, ON amaral45@my.yorku.ca

GitHub: <https://github.com/amarz45>

EDUCATION

York University

2024 – 2028

Computer Science, BSc, Honours

- 3.7/4.0 cumulative GPA (7.9 on a 9.0 scale)
 - Courses: Computation Theory, Data Structures, Object-Oriented Programming, Computer Organization
-

WORK EXPERIENCE

Sobeys

May 2026 – Present

IT Cybersecurity Analyst (Co-op)

Greater Toronto Area

- Wrote scripts to manage several enterprise platforms through REST APIs, cutting recurring work from hours to seconds
- Automated classification and inventory of untracked assets, improving visibility across the environment
- Used AI and tooling to examine large datasets and investigate trends over time and their underlying causes, replacing manual, tedious, and error-prone investigation
- Wrote detailed maintenance documentation for all tooling to support long-term upkeep

DataAnnotation

June 2025 – September 2025

AI Trainer (Code Reviewer)

- Reviewed and rewrote AI-generated code across 5+ programming languages for readability, correctness, and efficiency
 - Independently found, debugged, and fixed issues in open-source codebases containing 50+ files
 - Authored and used comprehensive unit tests and detailed rubrics to evaluate edge cases
-

PROJECTS

comicpress <https://github.com/amarz45/comicpress>

User-friendly cross-platform C++ GUI application that converts and compresses digital comic book files for e-readers. Uses an intricate and meticulously-optimized pipeline of image processing operations to reduce file sizes by up to 80% and improve visual fidelity.

nvim-cmp-fonts <https://github.com/amarz45/nvim-cmp-fonts>

Lua-based Neovim plugin that streamlines UI configuration by providing real-time autocompletion for fonts.

SKILLS

- **Programming languages:** Python, C, C++, Java, Bash, HTML, CSS, TypeScript/JavaScript
 - **Also worked with:** R, SQL, Rust
- **Software & tools:** Git, Docker, Linux, REST APIs
- **Methodologies:** OOP, systems programming, automation, unit testing, optimization, code review
- **Languages:** English (native), Arabic (native), French (intermediate)
